This program made extensive use of the Java Swing API, with special emphasis on JTabbedPane, JButton, JTextField, and JPanel. I referenced guides and tutorials made available by Oracle, the developers of Java, in my research.

<https://docs.oracle.com/javase/tutorial/uiswing/components/button.html>

<https://docs.oracle.com/javase/tutorial/uiswing/components/textfield.html>

<https://docs.oracle.com/javase/tutorial/uiswing/components/tabbedpane.html>

Additionally, I used a CSV writer class created by ashraf from Java Code Geeks as a reference template. I added further functionality and customization to the class.
